

# *About S2 Security Corp*

S2 Security is an independent manufacturer of IP-based physical security and video management systems that create a powerful, cost effective way to protect people, property and assets. Providing unmatched reliability and a 100% Web browser delivered user experience, S2 products are the physical security management systems of choice for Fortune 500, education, healthcare, manufacturing and government customers around the world.

## *Access Control Systems*

Enterprise-class, feature-rich S2 access control systems integrate credential-based access control, intrusion detection and video applications for a unified management and administration experience. 100% web based, the systems require no software installation or client license fees. Flexible system architecture allows for a range of applications from single sites to globally distributed physical security management systems. S2 access control system also integrate with legacy access control systems, allowing for easy upgrades.

## *Video Management Systems*

S2 video management systems offer advanced video forensics and tight integration with S2 access control products including S2 NetBox, S2 Enterprise and S2 Global. The S2 NetVR product line's unmatched integration between video and access events gives users immediate access to video related to events of interest. Real-time video surveillance is integrated into the Monitoring Desktop and customizable Widget Desktop of the associated S2 NetBox or S2 Enterprise controller through a web browser. For larger installations, multiple S2 NetVR appliances can be tied to a single S2 controller.

## *Converged Systems*

S2 NetBox VR products combine the power of the S2 NetBox security management system software with the S2 NetVR video management system in a seamlessly integrated solution. Using only a web browser, these converged, enterprise-class access control and video management solutions deliver unified system management and administration.

## *Mobile Security Management*

S2 mobile security management products allow field security officers and other authorized users to operate and manage their S2 system from anywhere. The system is administered from a central location, and all actions taken by users are instantly sent back to the command center. S2 mobile security management dramatically improves productivity, decision-making, and response time.

# Anadal Technologies Limited

are the authorized representative of S2 Security Corporation in Nigeria, having undergone training in the marketing, consultancy, installation and integration of their access control and video management systems. We sell, install, integrate, maintain and support S2 System devices and equipment.

Anadal Technologies Limited installed the Etihad Airways Security System in both their City (Sales) Office and the Murtala Mohammed International Airport office. In both locations, we installed access control systems with 10 portals, CCTV with 12 IP cameras, intercom and panic alarm systems managed by 2# S2 NextBox Nodes and 2# S2 NetVR Video Recorders, managed by the S2 Enterprise Controller in their Abu Dhabi head office through a Wide Area Network. We are currently maintaining the systems in the 2 sites.

We also installed the Emerson Process Management, Inc access control system in Victoria Island using 2# S2 NetDoor MicroNode for 2 portals. The system is linked and managed by their S2 NetBox Extreme Controller in Dubai.
